But the talk died out and the Administration has not seen fit to revive it or to press the question. Yet the present situation of daffairs and the possibilities which may spring out of recent events render it one of moment, whilst the question as large, as involved in the general law of nations, is one of exceeding interest and importance.

According to our census of 1860 one sixth part of our whole population consists part of the law of England—a law which has been administered withous any variation of doubt from the earliest time—the who once is under the allegiance of the English sovereign remains so for ever. The Beetheven Noise.

The details of the stayendous failure of the recent Beetheven noise in New York are gradually coming out. It is agreed that New York has reason to congratulate liself that the thing did fail. The really musical people only went once and came away with the Idea that the whole thing was a huge catch-penity, a regular "do," a "beauty sell," etc. Disgusted with the humbug and claptup of the affair, the real lovers of art have determined to celebrate properly in December next the cen-

"Music by the Band."

The "Mother of Family" writes us to know if it is not possible for our city fathers to make some arrangements with some one of the bands of the city to perform for an hour or two somewhere where she and her children "van walk, listen to the music and see friends." She says "there is no resort for nurses and children or young gentlemen and ladies where they can promenade and be sure of meeting those they know." While admitting the need of what the mother of a family wasts, will she permut herself to be referred to the ladies" man of the City Council? That gallant individual will doubtless immediately introduce a resolution suthoristing the Mayor to employ a band to play, say there evenings the week, at some point on Broadway accessible to all,

The harrowing feature about this abrupt "staggerer No. 1" (as Dick Swiveller would call it) is, that all of (as Dick Swivelier would call it) is, that all of me have to suswer at our peril. If one should say that there are situations in which there are inducements to a woman to lie, in the most bewitching manner, down would come the faminine tomahawk, and cat off the true-leat one in his prime. The question is one, be it ever remembered, that was not started by the "tyrsut man," but by one of the "little lower than the angels" parties. The fair Revolutioneer says there is "some foundation for this accusation." What is alle from the lips of beauty? Why, we shall bear next of scorpions in honey, spiders in the pressure of a

Everybedy will remember the pretty Mr. Edward B. Ketchum, who was detected several years ago in certain transactions which, being versitiated, led to that sice young man's residing at a State prison for some time. The lofty manner in which he scorred to come out of his cell until he was pronounced and duly adverticed as innocent, a martyr, etc., will also be borne in mind. Having kindly consented, however, to leave his prison, he returned to Wall street and renewed in a feeble way his ggantically Luliputium financial operations. The brilliant careerings of the acute Ketchum have just terminated for a second time, and instead of landing in lail, as before, "H'Edward' B. has merely ruined a poor dupe, who was his friend and believed so implicitly in his granp of mind and Herculean analysis as to allow kinnel 1 to be made the sharp Ketchum's monkey to pail the golden chestents to ut-for the Wall-street fire. THE CHINESS LARGE BML.

(Internati Gasette Washington Special.)

There seems to be a good deal of misunderstanding through the country about the Chinese Labor bill pending in the Senate. There has been some very foolish and extravagnat talk on it, but the bill itself is a good one. The custom in California is to bring over large loads of Chinese on three or four-year contracts and take what is substantially a mostgage on their families for re-payment of their outdis and cost of passage. These Chinese are then hired out at the best families to cach quark a wages going to him and the rest to the passage of the country who make contracts for themselves or through their friends. The work of these ship contractors is called a misdemessor, punishable by heavy fine, half of which goes to the informer and half to the Chinaman interested, on condition that he returns at once to his own country, under such regulations as the court may prescribe.
